## Sales of Securities in the Sixth War Loan

## Summary

Sales of United States Government securities in the Sixth War Loan reached a total of \$21.6 billions, the highest volume of sales in any war loan thus far, and more than \$7.6 billions in excess of the \$14 billions quota for the Loan. Sales to individuals aggregated \$5.9 billions as compared with a quota of \$5 billions, and sales to corporations and other investors reached \$15.7 billions as compared with a goal of \$9 billions. The \$5 billions goal for individuals was divided between \$2.5 billions for Series E bonds and \$2.5 billions for other securities. Both of these quotas were exceeded by a substantial margin. The following table summarizes sales and goals for individuals, and for corporations and other investors. The term individuals, throughout this article, includes partnerships and personal trust accounts.

Class of investor	Goal	Sales	Percent of goal achieved
	(In billions of dollars)		
Individuals:			
Series E savings bonds.	2.5	2.9	115
Other securities.....	2.5	3.0	121
Total.....	5.0	5.9	118
Corporations and other investors.....	9.0	15.7	175
Total for all investors...	14.0	21.6	154

In all, eight securities were offered in the drive, four nonmarketable issues and four marketable issues. The four nonmarketable issues consisted of Series E, F, and G savings bonds and Series C savings notes. Sales of Series E bonds aggregated \$2.9 billions, sales of F and G bonds amounted to \$0.7 billions, and sales of Series C savings notes reached \$2.4 billions.

The four marketable issues consisted of a one-year issue of certificates of indebtedness, a 2-3/4 year issue of Treasury notes, and two longer term bond issues. Sales of the one-year 7/8% certificates aggregated \$4.4 billions, almost as high as sales of a similar issue in the Fifth War Loan. Sales of the 1-1/4% Treasury notes due in September 1947 aggregated \$1.6 billions, moderately less than sales of a corresponding issue in the Fifth War Loan. Subscriptions to the 2% Treasury bonds of 1952-54 reached almost \$7 billions, the largest amount of sales of any issue in any war loan. Sales of the 2-1/2% bonds of 1966-71 aggregated \$2.7 billions, about 20% higher than sales for a similar issue in the Fifth War Loan. Further detail on sales by investor classes and by issues is shown in Chart 1 and Table 1.

Following the practice established during recent war loans, the total goal for the War Loan was divided between nonbank investor groups and excluded commercial banks, which were permitted,

however, certain limited purchases of securities concurrently with the Loan but not as a part of it. Such commercial bank purchases, as well as purchases by Treasury investment accounts, are discussed on page A-18.

The sales figures reported above and throughout this article refer to actual purchases of securities offered in the War Loan and do not necessarily reflect the net new investment by any investor class during the period of the Loan. Net acquisitions of securities by each investor class are affected not only by purchases of new securities but by redemptions and cash maturities of securities held and by market operations carried on between investor groups. Estimates of ownership for recent years are reported elsewhere in the "Treasury Bulletin".

The sales figures, with one exception, represent cash actually received by the Treasury, in conformity with the practice of not counting subscriptions unless they are accompanied by funds for immediate payment. The one exception is that a special plan was made available to life insurance companies, savings institutions, and State and local governmental units permitting them to defer payment in whole or in part on their subscriptions to the two marketable bond issues offered in the drive. Securities purchased on the deferred payment plan must be paid for in full at par and accrued interest not later than February 28, 1945. Purchases under the deferred payment plan aggregated \$985 millions.

## Organization for the Loan

The Secretary of the Treasury announced on October 6, 1944, that the Sixth War Loan would open on November 20 and close on December 16. The announcement included the national goals, divided between individuals and corporations, as well as a description of the types of securities to be offered. The Secretary stated that the goals and the securities to be offered had been determined after consultation with a group of chairmen of the State War Finance Committees, officials of the Federal Reserve System, a committee of the American Bankers Association and other investment authorities.

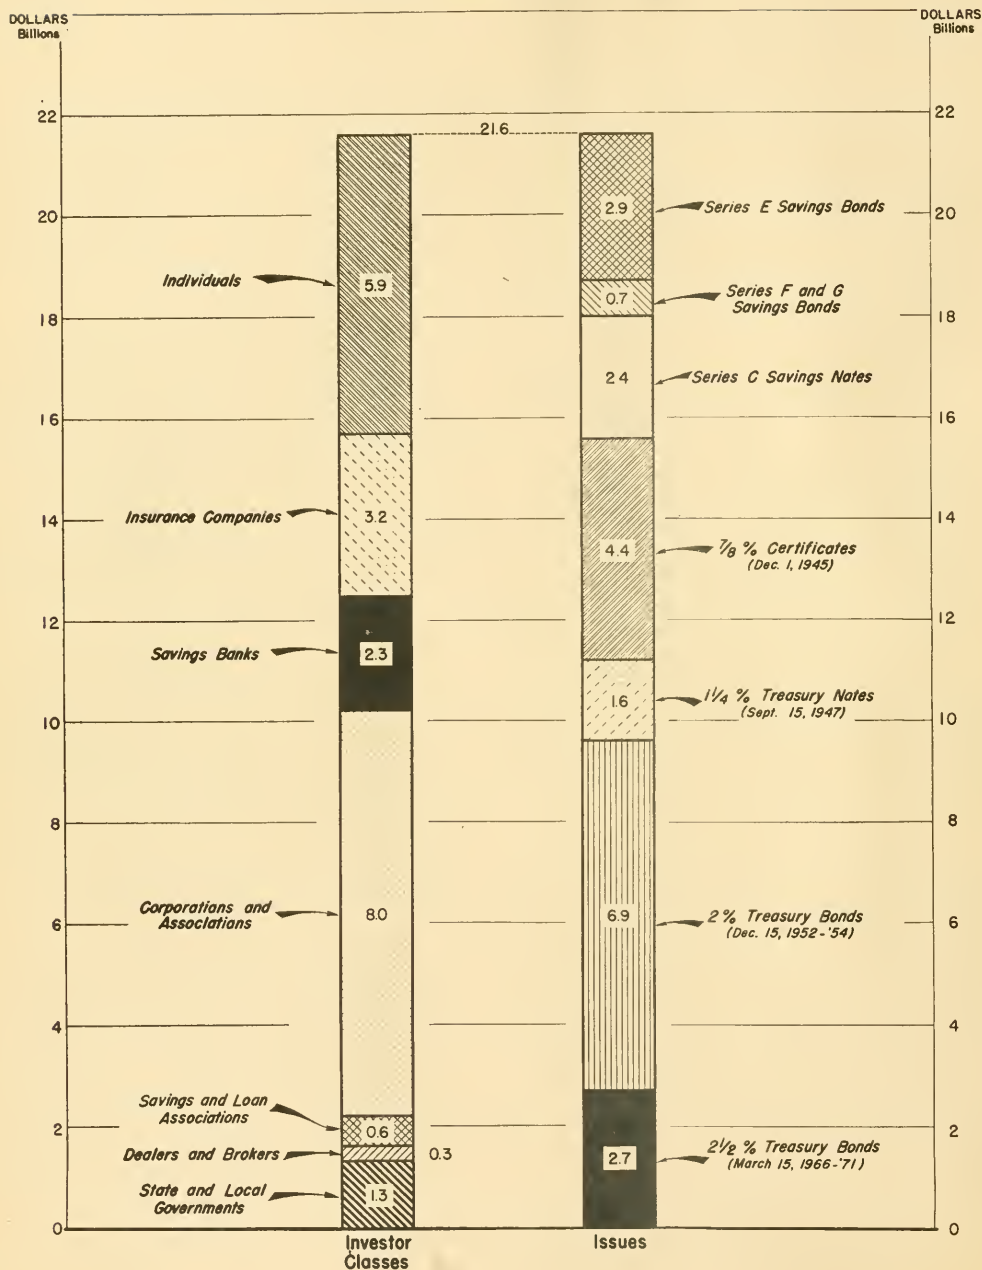

Following the procedure instituted in the Fourth War Loan it was announced that all subscriptions for Series E, F, and G savings bonds and for savings notes received at the Federal Reserve Banks and the Treasury during the months of November and December would be credited to the drive. This was done in order to permit millions of persons employed in industry and trade to participate in the drive through the purchase of bonds by weekly or semi-monthly deductions from their pay during this period. The final date for processing these subscriptions was later extended from December 31 to January 2 because the last day of December was a Sunday and the first day of January was a legal holiday.

All banks were requested to cooperate with

Chart 1

# SALES DURING SIXTH WAR LOAN

## By Investor Classes and by Issues

the Treasury by declining to make loans for purchases of Government securities for speculative purposes during the Sixth War Loan. This policy, however, was not intended to imply any disapproval of loans to enable investors to purchase securities in anticipation of income, provided that the loans were on a short-term or amortization basis fully repayable within six months. These principles were set forth in the joint statement on bank loans by national and State bank supervisory authorities on November 23, 1942. This statement was reprinted in the "Treasury Bulletin" for March 1944, page A-3. The Treasury also requested that commercial banks not make loans for the purpose of acquiring the drive securities later for their own account.

The pattern of organization that was followed during the Fifth War Loan was further expanded and enlarged during the Sixth Loan. As in previous drives, basic organization followed State, county, and local geographical lines. Approximately 6 million persons acted as volunteer salesmen as more stress than ever before was placed on personally soliciting potential buyers. There were 75,000 issuing agents cooperating in issuing the millions of pieces of Series E savings bonds sold during the Sixth War Loan.

Women's organizations, American Legion Posts, foreign language, fraternal, and religious groups, schools, and youth agencies were especially active in sales work during the drive. Farmers and farm organizations also played an important part. Each of the agricultural States had special farm programs which included farm-to-farm canvases by members of their volunteer bond corps. Retail stores cooperated by participating in a national window display contest, contributing free newspaper advertising and assuming an over-all quota of \$300 in bond sales per salesperson. Theaters were again very active during the drive, holding special War Bond shows at which admittance was by war bond purchase. Sponsored newspaper advertising and radio time contributed much toward making the drive a success. The armed services participated extensively, providing personnel, exhibits, and demonstrations.

Quotas were established for employees of many manufacturing plants and individual businesses, the most common quota being an extra \$100 bond for the two months period of the drive, to be met through a combination of cash purchases and extra payroll allotments. Labor and management groups undertook a joint responsibility in canvassing individual subscribers both in the plants and at their homes.

The American Bankers Association, through its War Loan Committee, again cooperated extensively in the drive. Members were requested to accept a program which included the responsibility of canvassing their depositors. Banks entered the community program by undertaking to help in the sales work to reach quotas established for cities, towns, and localities and in many localities accepted sales quotas themselves.

In order to prevent disturbances to the money market and the banking situation the practice started in previous war loans was used again to avoid transfers of funds by subscribers who wished to help local communities make their quotas. Under this procedure, the Treasury and the Federal Reserve Banks undertook to give statistical credit to the various localities for subscriptions made by individuals with interests in more than one community or for purchases made at the central offices of business organizations operating in more than one area.

In the case of many large business organizations, Series E bonds bought by employees under payroll savings plans or during special plant drives were issued from a central office; the procedure worked out for allocating credit made it possible in these cases to transfer the credit to the purchaser's home address or to the place of his employment. Likewise, stubs representing sales by the Federal Reserve Banks, the Office of the Treasurer of the United States, etc., were sorted by counties in order to pass credits to local communities. Sales by issuing agents whose activities are largely confined to one city or county, (such as banks, post offices, etc.) were credited to the county of their location. All subscriptions from insurance companies were assigned to the State of the home office, as in the past.

### Development of Quotas

As already noted the national quota for the Sixth War Loan of \$14 billions was divided between \$5 billions for individuals and \$9 billions for corporations and other investors. These objectives were set after consideration of the financial needs of the Treasury in the months ahead, and after careful review of the funds accumulating in the hands of different investor classes during the war period, and particularly in the period since the close of the Fifth War Loan.

Production, in general -- and war production in particular -- creates a pool of funds which the Treasury must draw on as much as possible to finance the war. Production turns out physical goods and services for war and civilian purposes; it also generates, at the same time, income equal in amount to the value of production. What the people of the Nation receive as income is simply the equivalent of what they produce as goods and services. If the Federal Government, therefore, spends more than it receives in taxes, the people of the country have more income left than they can use to purchase the limited supply of goods and services without driving up prices. For the Federal Government, a deficit results; for the rest of the economy, an identical surplus. It is precisely this surplus which exercises an inflationary pressure on the price level, and which the Government endeavors to reach to the greatest possible extent through its borrowing program.

In the calendar year 1944, total Federal ex-

penditures, including net outlays of Government corporations, amounted to \$97.8 billions. Net budgetary receipts aggregated \$44.4 billions, leaving a deficit of \$53.3 billions to be financed through borrowing. Liquid savings equivalent to this \$53 billions were made up of about \$44 billions by individuals, approximately \$7 billions by corporations, and \$2 billions by State and local governments. The \$44 billions of liquid savings by individuals comprises three broad groups of savings: (1) savings from wages and salaries, dividends, interest, rents, and royalties; (2) savings from farm operations and from unincorporated businesses, including allowances for reserves for depreciation, depletion, etc., set up by these businesses, but not invested in new capital assets; and (3) savings in the form of social security accumulations.

In analyzing these savings from the point of view of the war bond program allowance must be made for the fact that large amounts of new savings are transferred, in effect, to other investors rather than being held by the person or business originally doing the saving. Debt repayment, for example, transfers funds to banks, mortgage companies, savings and loan associations, insurance companies, and other investor classes. Savings in the form of insurance effectively transfer funds from individuals and businesses to insurance companies. New deposits in savings accounts transfer funds to mutual savings banks, commercial banks, or the postal savings system. Such transfers of funds particularly reduce the amount of new savings in the hands of individuals which may be tapped directly in war loan drives and increase the amount of securities which may be sold to institutional investors, such as insurance companies and mutual savings banks. These transfers were taken into account in setting national quotas for the Sixth War Loan.

In conformity with the decentralized operation of the war loan program, the national quotas were broken down by States and supplied to the respective chairmen of the State War Finance Committees several weeks before the opening of the drive. State quotas were in turn broken down by the State chairmen by counties and frequently by other geographical units. Certain economic data were provided the State chairmen for this purpose but the breakdown into local quotas was ultimately determined in each State in conformity with local conditions.

### Daily Progress Charts

In order to enable the State, county, or local war finance chairmen to measure the progress of the campaign in their areas, a statistical reporting system which had been inaugurated during earlier drives was used extensively during the Sixth War Loan. Although only sales to individuals were announced to the public by the Treasury during the period from November 20 to December 1 -- in conformity with the emphasis being placed on sales to individuals during the

loan -- daily reports were compiled from the beginning of the drive showing subscriptions for each issue by individuals and by all other investor groups as a whole in each county in the United States. More detailed information was supplied for each State as a whole, showing purchases of each issue by each investor class.

The State chairmen were also provided with a set of charts on which they could plot the daily sales progress by investor classes. These charts showed the sales patterns, worked out prior to the Sixth War Loan, which it was believed cumulative sales would have to reach each day to make the goal. Separate analyses were provided for (1) all investor classes, (2) corporations, (3) individuals, (4) Series E bond sales, and (5) sales of other securities to individuals. The sales patterns were worked out on the basis of experience with different time factors in previous drives. Chart 2 presents this information for one State (Illinois) showing the daily progress up to the close of the drive. The solid line in the chart shows actual sales as they were plotted from day to day, while the broken line shows the sales pattern for each of the several categories.

Chart 3 presents similar information for the United States as a whole. It will be noted that the over-all national quota of \$14 billions was passed on December 7, at which time the sales pattern called for sales of slightly less than \$10 billions. The corporation goal of \$9 billions was exceeded on December 4, while the goal for individuals was not passed until December 22.

### Securities Offered

The eight securities offered for sale in the Sixth War Loan were similar to those offered in the Fifth. The four nonmarketable and four marketable issues which were included are outlined below:

#### Nonmarketable issues:

- Savings bonds:
  - Series E
  - Series F and G
- Savings notes, Series C

#### Marketable issues:

- 7/8% Certificates of indebtedness, due 12/1/45
- 1-1/4% Treasury notes, due 9/15/47
- 2% Treasury bonds, due 12/15/54 and callable by the Treasury on or after 12/15/52
- 2-1/2% Treasury bonds, due 3/15/71 and callable by the Treasury on or after 3/15/66

The chief characteristics of the securities offered in the Sixth War Loan are fully described in the "Treasury Bulletin" for November 1944 on pages A-8 and A-9. All marketable issues available during the Sixth War Loan bore interest from December 1, 1944. The Treasury requested that

CUMULATIVE

## Analysis of Sales to Individuals

there be no trading in these securities, and no purchases other than on direct subscription, until after December 16. The 2-1/2% Treasury bonds of 1966-71 cannot be held by commercial banks prior to December 1, 1954, except when acquired for the limited investment of time deposits as discussed on page A-18.

Final decisions on the securities offered for sale in the Sixth War Loan were the result of experience during previous drives and recommendations received by the Treasury while plans for the drive were under consideration. The two marketable bond issues varied with respect to interest rates, maturities, marketability, etc., and thus met the needs of investors with financial plans calling either for medium-term or for long-term securities. In addition, the redemption features of the savings bonds provided liquidity for individuals with relatively small resources. The certificates and the savings and Treasury notes, on the other hand, were intended to supply an investment outlet for business organizations, State and local governments, and others who were looking for a high degree of liquidity in the placing of shorter term funds.

### Sales by Classes of Investors and by Issues

In Chart 1 total sales in the Sixth War Loan are distributed according to (1) investor classes and (2) kinds of securities. Further detail on the distribution of aggregate sales by investor classes and by issues is given in Table 1. A comparison of goals and actual purchases for the major investor groups is shown in Chart 4.

As already noted sales to individuals aggregated \$5.9 billions, 18% in excess of the quota. Sales of Series E bonds reached \$2.9 billions, passing the \$2.5 billions quota by 15%. Sales of other securities to individuals exceeded the \$2.5 billions goal by a somewhat larger margin (21%).

Total sales of \$15.7 billions to corporations and other investors, as already noted, exceeded the \$9 billions quota by 75%. Of this group, sales to insurance companies reached \$3.2 billions, and sales to savings banks totaled \$2.3 billions. Of the remaining \$10.2 billions of sales to corporations and other investors, \$8.0 billions went to corporations and associations, \$0.6 billions to savings and loan associations, \$0.3 billions to dealers and brokers, and \$1.3 billions to State and local governments. Sales to savings and loan associations are classified separately for the first time in the Sixth War Loan. Previously they were included with corporations and associations.

The distribution of sales of the various issues offered during the drive is shown in the table below. As in prior war loans sales of mar-

Security	Amount (In millions of dollars)	Percentage distribution
Nonmarketable issues:		
Savings bonds:		
Series E.....	2,868	13.3
Series F and G.....	719	3.3
Savings notes, Series C..	2,429	11.2
Total nonmarketable issues.....	6,016	27.8
Marketable issues:		
7/8% Certificates of indebtedness, 12/1/45....	4,405	20.4
1-1/4% Treasury notes, 9/15/47.....	1,550	7.2
2% Treasury bonds, 12/15/52-54.....	6,939	32.1
2-1/2% Treasury bonds, 3/15/66-71.....	2,711	12.5
Total marketable issues..	15,605	72.2
Total.....	21,621	100.0

ketable issues were most prevalent, since these issues are particularly well adapted to the needs of institutions, local governmental units, and business organizations with large blocks of funds to invest. Series C savings notes were the only type of nonmarketable issue available for unlimited purchase by such investors. Sales of the 7/8% certificates of indebtedness and the 1-1/4% Treasury notes reached \$4.4 and \$1.6 billions, respectively, slightly less than sales of similar issues in the Fifth War Loan. Subscriptions to the 2% Treasury bonds amounted to almost \$7 billions, the highest volume of sales of this type of issue in any war loan. Sales of the 2-1/2% Treasury bond reached \$2.7 billions.

Among insurance companies the long-term 2-1/2% Treasury bonds of 1966-71 were most popular and the 2% Treasury bonds of 1952-54 followed closely. About one-half of insurance company purchases were in the former and about 42% in the latter issue. Savings banks showed a strong preference for the medium-term 2% Treasury bonds placing 87% of their purchases in this type of security.

The 7/8% certificates of indebtedness were most popular among corporations and associations; over 40% of their purchases were accounted for by this issue. Series C savings notes and 2% Treasury bonds were also of major importance in sales to corporations and associations. Sales of Series C savings notes accounted for 28% and the 2% Treasury bonds for 17% of their purchases.

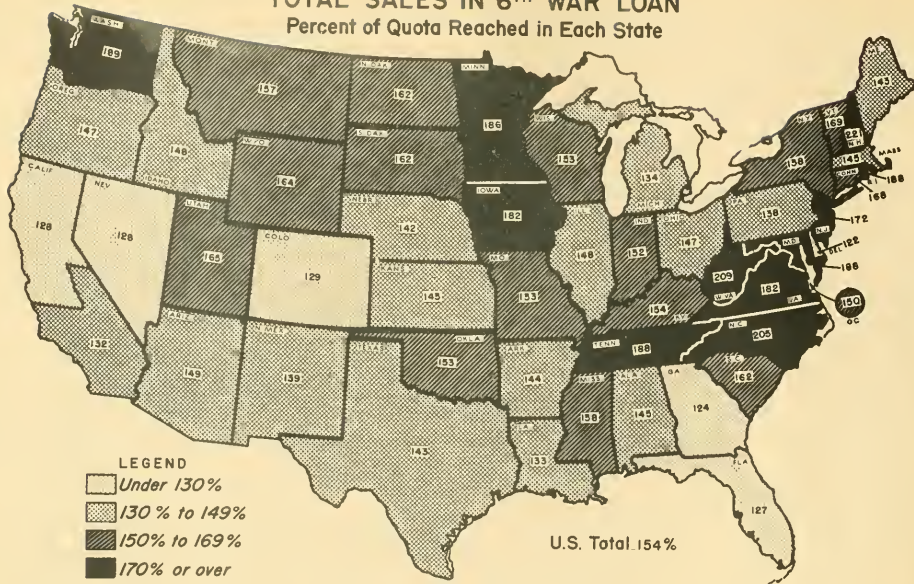

Purchases by dealers and brokers and savings and loan associations were concentrated in the 2%

Treasury bonds. State and local governments invested primarily in the 7/8% certificates and the 2% bonds.

### Subscriptions Under the Deferred Payment Plan

The deferred payment plan allowed certain groups of investors through February 28, 1945 to make full payment for their subscriptions to the 8-10 year 2% Treasury bonds of 1952-54 and to the long-term 2-1/2% Treasury bonds of 1966-71. The securities themselves are delivered only as final payment is received. The investors permitted to use this plan were: life insurance companies, savings institutions, State and local governmental units, and similar public corporations and agencies.

The table below shows subscriptions made under the deferred payment plan by investor classes and issues.

Class of investor	Total	2-1/2% Treas- ury bonds	2% Treas- ury bonds	Not classi- fied
	(In millions of dollars)			
Savings banks.....	428	8	420	-
Insurance companies.	432	249	151	32
State and local gov- ernments.....	76	27	49	-
Savings and loan associations.....	43	6	34	3
Fraternal benefit associations and other investors...	6	5	1	-
Total.....	985	295	655	35

Sales to savings banks and insurance companies of \$428 and \$432 millions, respectively, accounted for the major part of subscriptions under this plan. Deferred payment subscriptions by these investor groups in the Sixth War Loan were about three times such sales in the Fifth Loan.

### Sales by States

The accompanying maps show the percentage of quotas reached during the Sixth War Loan in each of the States for (1) total sales, (2) sales to corporations and other investors, (3) sales to individuals, and (4) sales of Series E savings bonds. Table 2 compares the dollar value of sales with goals for the same categories in each State. For purposes of this discussion the District of Columbia and Northern and Southern California are counted as separate State units.

Total sales and sales to corporations and other investors exceeded the goals in all the States (Map 1 and Map 2). Sales quotas for individuals (Map 3) were not reached in six of the States, namely, four New England States (Connecticut, Maine, Rhode Island and Vermont) and two Southern States (Florida and Georgia). Only one

State, Maryland, failed to achieve the sales quota for Series E savings bonds (Map 4). The record for sales to individuals in the Sixth War Loan, therefore, was much better than in the Fifth, when 16 States did not reach their sales goals for individuals and 10 States fell short in Series E bond sales.

Three States, Montana, North Dakota, and Wyoming exceeded their Series E sales goals by 50% or more. Seventeen States achieved 120% to 149% of their goals. Although, as mentioned above, all States but one reached their E bond quotas, the Western part of the country made a far better showing than the East.

Among the territories and possessions, Alaska and Hawaii reached 154% and 142% of their E bond quotas respectively, thus ranking with the top four States.

Table 3 supplies additional information on sales by States. In the table, sales to individuals in each State are broken down between Series E savings bonds, Series F and G savings bonds, and savings notes and marketable securities as a whole; total sales to each of the remaining investor classes are also shown for each State. As in prior war loans, the distribution of sales to insurance companies, savings banks, corporations and associations, savings and loan associations, and dealers and brokers largely reflects the concentration of the funds of these organizations in the various parts of the country. However, as noted above, the State distribution of sales to corporations was also affected by allocations of statistical credits from one State to another which were made by the Federal Reserve Banks in accordance with the wishes of subscribers.

A supplement to this article, and to the current "Treasury Bulletin", is being prepared for early release and will be available upon request. This supplement will consist of additional tables on the Sixth War Loan showing by States the sales to each investor class, classified by type of issue.

### Comparison of the Results of the Six War Loans

The distribution for the six war loans of total sales in dollar amounts and the percentage division of sales among the major investor groups is given in the table on page A-12.

Sales in the six war loans aggregated \$109 billions, of which nonbank investors accounted for \$99 billions or 91%. Sales to individuals aggregated \$28 billions or 25% of the total, while corporations and other investors accounted for \$72 billions or 65%. Sales to commercial banks, which were included only in the first two war loans and then on a limited basis, amounted to \$10 billions, or 9% of the total. As noted earlier, war loan sales figures represent gross

Total for six war loans....	<u>100.0</u>	<u>25.4</u>	<u>65.3</u>	<u>9.3</u>

1/ Treasury investment accounts were included in the first three war loans only; during succeeding war loans, sales to these accounts were handled outside of the drive.

2/ Commercial banks were allowed to buy only \$5 billions of Federal securities during each of the first two war loans, and were excluded from direct participation in all later war loans.

A comparison of sales with goals for each of the six war loans is given in Chart 4 for (1) all investors, (2) individuals, (3) corporations and other investors (excluding commercial banks), and (4) commercial banks (included only during the first two war loans). Table 4 gives a historical analysis of sales of securities by investor classes and by issues for each war loan. Details on the sales goals and dates relating to the six drives are presented in Table 5. Table 6 gives for Series E bonds the dollar value and the number of units of each denomination sold during each of the six drives.

Note: In accordance with customary Bulletin practices, all figures in this article have been rounded and will not necessarily add to totals. Percentages, in all cases, have been calculated from unrounded figures.

\* Less than \$500,000.

1/ Includes partnerships and personal trust accounts.

2/ Includes purchases by United States Government agencies and trust funds other than those identified as Treasury investment accounts (defined in Table 4, foot-

note 6). Such purchases amounted to \$42 millions.

3/ Includes their agencies and their trust, sinking, and investment funds.

4/ Figures do not add to the total because of minor reporting differences.

\* Less than \$500,000.

<sup>1/</sup> Includes partnerships and personal trust accounts.<sup>2/</sup> Includes purchases by United States Government agencies and trust funds other than those identified as Treasury investment accounts defined in footnote 6). Such purchases amounted to \$32 millions in the First War Loan, \$42 millions in the Second, \$82 millions in the Third, \$49 millions in the Fourth, \$32 millions in the Fifth, and \$42 millions in the Sixth.<sup>3/</sup> Purchases by savings and loan associations in the Sixth War Loan are shown separately for the first time in Tables 1 and 3 of this article.<sup>4/</sup> Figures for the Second War Loan exclude amounts distributed to or earmarked for nonbank investors by dealers and brokers; these amounts have been classified in the appropriate nonbank investor classes.<sup>5/</sup> Includes their agencies and their trust, sinking, and investment funds.<sup>6/</sup> Treasury investment accounts represent those United States Government agencies and trust funds whose investments are handled through the facilities of the Treasury Department. They were included in the First, Second, and Third War Loans only.<sup>7/</sup> Included in First and Second War Loans only.<sup>8/</sup> Sales of F and G savings bonds and Series C savings notes to corporations and other investors in First and Second War Loans were arbitrarily assigned to corporations and associations.<sup>9/</sup> Includes sales of small amounts of Series A tax notes.<sup>10/</sup> Figures represent net increase in Treasury bills outstanding during December 1942 and April 1943, respectively, and were arbitrarily assigned to commercial banks.

Table 5.- Dates and Goals Relating to the Six War Loans

War Loan	Sales period for marketable issues <sup>1/</sup>	Sales period for non- marketable issues	Date interest commenced on marketable issues	Goals (In millions of dollars)						
				Total	Commercial banks	Nonbank investors

Sixth War Loan.....	66,132	1,488	43,560	10,226	9,007	1,085	766	100.0	2.2	65.9	15.5	13.6	1.6	1.2

<sup>1/</sup> The \$10 denomination Series E bond was authorized by the Secretary of the Treasury on June 7, 1944, and was made available only to members of the Military and Naval Forces

of the United States through such agencies as might be provided within their respective establishments by the Secretary of War and the Secretary of the Navy.

## Security Purchases Outside the Sixth War Loan by Commercial Banks and Treasury Investment Accounts

### Commercial Banks

Concurrently with the Sixth War Loan, commercial banks were permitted to subscribe in limited amounts to the 2% and 2-1/2% Treasury bonds offered in the drive and to Series F and G savings bonds. The limit on such purchases was set at 10% of the combined amount of time certificates of deposit of individuals and nonprofit corporations or associations, and of savings deposits, but not more than \$500,000 for any one bank. Purchases of the Series F and G savings bonds were restricted further by the regular annual limit of \$100,000 issue price per subscriber for both issues combined. Subscriptions by commercial banks for the limited investment of time deposits were not considered as part of the Sixth War Loan nor were they credited toward attainment of the quotas.

Subscriptions by commercial banks to the issues available to them under these limits aggregated \$1,014 millions. Distribution of the purchases by issues is presented below.

Description of security	Amount purchased (In millions of dollars)
2% Treasury bonds, 12/15/52-54.....	886
2-1/2% Treasury bonds, 3/15/66-71....	72
Series F savings bonds.....	19
Series G savings bonds.....	37
Total.....	1,014

### Treasury Investment Accounts

Subscriptions by Treasury investment accounts totaled \$762 millions during the period of the Sixth War Loan. These were divided between \$662 millions of the 2-1/2% and \$100 millions of the 2% Treasury bonds offered in the drive. These purchases, however, like those permitted to commercial banks, were not attributed to sales in the Sixth War Loan. Treasury investment accounts are those United States Government agencies and trust funds whose investments are handled through the facilities of the Treasury Department.

## Treasury Market Financing: Refunding of December 1 Certificates and 4% Treasury Bonds

Exchange offerings were made concurrently with the Sixth War Loan for two outstanding Treasury securities. These constituted the only market financing operations, other than the regular weekly offerings of Treasury bills, in November and December 1944.

On November 20, the day on which the Sixth War Loan drive commenced, subscription books were opened for the exchange of the 7/8% certificates of indebtedness due December 1, 1944, into 0.90% Treasury notes dated December 1, 1944, and maturing January 1, 1946. Subscription books on this offering were closed on November 22, except that subscriptions amounting to \$100,000 or less were accepted through November 25. Of the \$3,540 millions of maturing certificates, \$3,416 1/2 millions, or 96% were exchanged.

On November 20, the Treasury also offered holders of the 4% Treasury bonds of 1944-54, outstanding in the amount of \$1,037 millions, and called for redemption on December 15, 1944, an opportunity to exchange their holdings into three of the securities offered in the Sixth War Loan, namely the 1-1/4% Treasury notes due September 15, 1947, the 2% Treasury bonds of December 15, 1952-54, and the 2-1/2% Treasury bonds of March 15, 1966-71, subject to the proviso that the 2-1/2% bonds may not be held by commercial banks for their own account prior to December 1, 1954. Subscription books for this exchange transaction remained open through December 9, except for subscriptions of \$100,000 or less, which were received up to and including December 15, the

payment date for the called bonds. Exchanges amounted to \$907 millions, or 87% of the outstanding amount of the 4% bonds. These subscriptions were not counted toward the goals in the Sixth War Loan. The distribution of accepted exchanges among the three new securities is shown in the following table:

New issue	Amount (In millions of dollars)	Percent of total
1-1/4% Treasury note, 9/15/47.....	137	15
2% Treasury bond, 12/15/52-54.....	737	81
2-1/2% Treasury bond, 3/15/66-71.....	33	4
Total exchanges of 4% Treasury bonds of 1944-54	907	100

The weekly offering of Treasury bills was reduced from \$1,300 millions to \$1,200 millions, or thereabouts, with the issue dated November 30. For seven previous weeks the weekly offering had been \$1,300 millions of which \$1,200 millions was offset by weekly maturities of bills and \$100 millions represented new money. The December weekly offering rate of \$1,200 millions was equal to weekly maturities.

1/ This figure has been revised from the preliminary figure reported in the table on page 32 of this issue of the "Treasury Bulletin".

Source: Daily Treasury Statements, except as noted.

\* Less than \$500,000.

1/ Based upon Budget estimates revised as of August 1, 1944.

2/ Includes unmet enrichment tax and taxes withheld by employers under both the Revenue Act of 1942 and the Current Tax Payment Act of 1943. For details see following chapter on Receipts and Expenditures and Appropriations, Table 2.

3/ Includes chiefly alcoholic beverage taxes, tobacco taxes, manufacturers' and retailers' excise taxes, and estate taxes.

4/ Includes deposits resulting from the renegotiation of war contracts. Information on the amount of such deposits is not available on the basis of Daily Treasury Statements. On the basis of covering warrants, such deposits were as follows: fiscal year 1943, \$958 millions; fiscal year 1944, \$2,235 millions, of which \$113 millions represented a voluntary return of excess profits. Budget estimates of such deposits for the fiscal year 1945 are \$1,212 millions.

5/ For explanation, see tables in next chapter on Social Security program.

6/ Excludes expenditures for public debt retirements which are chargeable to the sinking fund, etc. under special provisions of law.

7/ Includes expenditures classified as transfers to trust accounts, etc.,

for the Admitted Service Certificate Fund and the National Service Life Insurance Fund.

8/ Includes Public Works transactions classified as Revolving Funds (net).

9/ Includes Aid to agriculture transactions classified as Revolving Funds (net); expenditures of the Department of Agriculture classified as Departmental in the Daily Treasury Statement; and Office of Distribution transactions classified as transfers to trust accounts, etc.

10/ Includes expenditures classified as transfers to trust accounts, etc. for the Railroad Retirement Account and the Railroad Unemployment Insurance Administration Fund. Includes expenditures made by Office for Emergency Management, War Manpower Commission (U. S. Employment Service) under authority of the Social Security Act.

11/ Includes National Youth Administration.

12/ Represents transfers to public debt accounts for excess profits tax refund bonds.

13/ Includes departmental expenditures not otherwise classified and expenditures classified as transfers to trust accounts, etc., for Government employee retirement and insurance funds.

\* Less than \$500,000.

1/ Includes public works undertaken by the Veterans' Administration.

2/ Does not include expenditures for (1) revolving funds or (2) transfers to trust accounts, etc. These are shown in Table 5.

3/ Includes public buildings, public highways (including forest roads and trails), river and harbor work and flood control, Tennessee Valley Authority, Federal Public Housing Authority (formerly U. S. Housing Authority), reclamation projects and the Public Works Administration. Excludes certain expenditures for public works in connection with war activities by the Federal Works Agency, beginning July 1941.

4/ Consists of Farm Credit Administration, Federal Farm Mortgage Corporation, Federal land banks, Rural Electrification Administration, War Food Administration, and Department of Agriculture departmental expenditures. (War Food Administration comprises Agricultural Adjustment Agency, Farm Security Administration, Office of Distribution, Soil Conservation and Extension Service, and Other).

5/ Includes railroad retirement and railroad unemployment activities and excludes expenditures made by Office for Emergency Management, War Manpower Commission (U. S. Employment Service) under authority of Social Security Act. For further details, see tables which follow on the Social Security program.

6/ Work Projects Administration was formerly Works Progress Administration.

7/ Beginning with July 1942, expenditures for the National Youth Administration are classified as "war activities expenditures".

8/ Includes expenditures of the Reconstruction Finance Corporation for relief through loans and grants to States, municipalities, etc.

9/ Excludes expenditures for the U. S. Maritime Commission, departmental expenditures under the Social Security program and the Department of Agriculture departmental expenditures.

10/ Includes expenditures for the following: Office of Education, and Public Health Service of the Federal Security Agency; refund of taxes and duties by the Treasury Department; Post Office Department postal deficiencies; Federal Housing Administration; Treasury Department investments in Federal savings and loan associations; certain expenditures of the Panama Canal; and capital stock of the Federal Deposit Insurance Corporation, Home Owners' Loan Corporation, Federal Home Loan Bank, and Disaster Loan Corporation.

11/ Gross expenditures have been reduced \$160 millions representing the repayment of capital funds by certain United States Government agencies. For further details see "Treasury Bulletin" for June 1943, page 9, footnote 12.

\* Less than \$50,000.

<sup>1/</sup> Formerly Title VIII of the Social Security Act.<sup>2/</sup> Formerly Title IX of the Social Security Act. Includes amounts equal to appropriations to Railroad Unemployment Insurance Administration Fund equivalent to amounts of taxes collected with respect to the period from January 1936 to June 1939, inclusive, from employers subject to the Railroad Unemployment Insurance Act (See Table 3 of Section 1).<sup>3/</sup> Prior to January 1, 1940, figures represent amounts transferred to the Old-Age Reserve Account. From January 1 to July 1, 1940 "transfers" were made to the Federal Old-Age and Survivors Insurance Trust Fund. Subsequently receipts have been deposited in the General Fund of the Treasury and "appropriated" directly to the Federal Old-Age and Survivors Insurance Trust Fund. Amounts shown as transfers reflect deductions made for reimbursement to the General Fund account to cover administrative expenses, which are shown as expenditures in

Section II, Table 1.

<sup>4/</sup> Includes only expenditures from appropriations made specifically for administrative expenses relating to the Social Security Act; namely, Social Security Board, Department of Commerce, and Department of Labor; and administrative expenses reimbursed to the General Fund of the Treasury under Section 201 (f) of the Social Security Act, as amended. Beginning July 1, 1940, includes also administrative expenses payable from other appropriations, principally for the following agencies: Bureau of Internal Revenue of the Treasury Department, and Public Health Service and Office of Education of the Federal Security Agency.<sup>5/</sup> Covered by appropriations by Congress.<sup>6/</sup> Second Deficiency Appropriation Act, fiscal year 1938, appropriated \$31 million for refunding to certain States portions of Federal employers' tax for 1936 collected under the Social Security Act.

\* Less than \$50,000.

1/ Operated as Railroad Unemployment Insurance Administration Fund.

2/ Represents 10% of contributions under the Railroad Unemployment Insurance Act; the remaining 90% is deposited in the Railroad Unemployment Insurance Account, Unemployment Trust Fund (See Section II, Table 3). Excludes amounts appropriated to Railroad Unemployment Insurance Administration Fund equivalent to amounts of taxes collected for the period January 1936 through June 1939 from employers subject to the Railroad Unemployment Insurance Act. These amounts aggregate \$17.7 millions

and were distributed by calendar year, as follows: 1936, \$2.7 millions; 1937, \$5.3 millions; 1938, \$6.8 millions; and for the first six months of the calendar year 1939, \$2.9 millions. These amounts are included in Table 1 under Federal Unemployment Tax Act (unemployment insurance).

3/ Includes only expenditures from appropriations made specifically for administrative expenses relating to the Railroad Unemployment Insurance Act.

4/ Represents excess funds of the Railroad Unemployment Insurance Administration Fund (under Act of Oct. 10, 1940).

5/ Covered by appropriations by Congress.

Total, 78th Congress, Second Session.....			55,502,888,954	8,210,599,974
Permanent appropriations and net transfers from other than war activities appropriations <sup>13/</sup> .....			231,778,425	-
Total approved.....			\$359,777,816,966	\$15,865,584,376
Liquidations of 1940 and prior contract authorizations.....			-467,872,846	-
Total approved appropriations and net contract authorizations <sup>1/</sup> .....			\$359,309,944,120	\$15,865,584,376

<sup>1/</sup> Consists of appropriations and net contract authorizations available on and after July 1, 1940. Excludes: (1) authorizations of the Reconstruction Finance Corporation and its affiliates for war purposes, and (2) unexpended balances of appropriations on June 30, 1940 (except immediately available funds from fiscal year 1941 appropriations) available for expenditure in the fiscal year 1941.

<sup>2/</sup> Contract authorizations have been reduced by later appropriations which were earmarked in authorizing acts for this purpose.

<sup>3/</sup> Represents the net amount of contractual authority that the President may authorize the head of any department or agency of the Government to enter into for the procurement of defense articles, information, or services for the government of any country whose defense the President deems vital to the defense of the United States.

<sup>4/</sup> Includes \$9,693,585,500 appropriated for the fiscal year 1942.

<sup>5/</sup> Unappropriated contract authorizations for the naval expansion program are as follows:

Date approved	Public Law No.	Amount
Feb. 7, 1942	441	..... \$2,171,000,000
June 26, 1943	92	(Estimated by Navy Department)..... 947,134,522
Dec. 17, 1943	204	(Estimated by Navy Department)..... 3,650,449,830
June 28, 1944	375	..... 55,000,000
June 28, 1944	375	(Estimated by Navy Department)..... 1,800,000,000
Total.....		\$8,623,584,402

<sup>6/</sup> Includes \$650,000 for the fiscal year 1941 and \$209,440,000 for the fiscal year 1943. Of the latter amount, \$440,000 was made immediately available.

<sup>7/</sup> Includes \$7,851,460 appropriated for the fiscal year 1942.

<sup>8/</sup> Includes \$30,000,000 for the fiscal year 1942 and \$172,439,000 for the fiscal year 1943.

<sup>9/</sup> Includes \$1,081,000,000 for the fiscal year 1944.

<sup>10/</sup> Includes \$184,632,448 for the fiscal year 1945.

<sup>11/</sup> Estimates of appropriations for war purposes reported by the President to Congress and submitted to the Committee on Appropriations, amounting to \$400,976,022, are not included.

<sup>12/</sup> For details of appropriations made by 76th Congress, Third Session, see "Treasury Bulletin" for March 1944, page 5.

<sup>13/</sup> Includes actual transfer of balances of the Bureau of Marine Inspection and Registration from the Department of Commerce to Coast Guard, Navy, in the amount of \$1,153,802 in accordance with Executive Order 9083, dated February 28, 1942. Also includes \$5,430,534 received as war contributions under authority of the Second War Powers Act and deposits of advance payments made by foreign governments to the Defense Aid Special Fund for the procurement of defense articles amounting to \$72,916,951.

\* Less than \$500,000.

1/ These figures are not intended to reflect the budgetary position of the Government, and will not agree with budgetary figures on receipts, expenditures, and deficit such as those appearing in the Daily Treasury Statement and in other tables in the "Treasury Bulletin". For an explanation of the revisions made in Daily Treasury Statement figures to arrive at this cash series, see the "Treasury Bulletin", February 1939.

2/ Includes sale of commodity food stamps, Office of Distribution (formerly Agricultural Marketing Administration).

3/ Complices Public Buildings Administration, Public Roads Ad-

ministration, Public Works Administration, Federal Public Housing Authority, river and harbor work and flood control, Tennessee Valley Authority, forest roads and trails, and reclamation projects.

4/ Consists of Farm Credit Administration, Federal Farm Mortgage Corporation, Federal land banks, Rural Electrification Administration, War Food Administration, and Department of Agriculture departmental expenditures. (War Food Administration complices Agricultural Adjustment Agency, Farm Security Administration, Office of Distribution, Soil Conservation and Extension Service, and Other).

5/ Excludes transactions under transfers to trust accounts, etc.

6/ Excludes accrued interest on United States savings bonds.

1/ In the fiscal years 1935 and 1936, \$91 millions and \$554 millions, respectively, were transferred from increment on gold to the working balance for retirement of national bank notes. In this statement, however, charges for retirement of national

bank notes are reflected directly against increment on gold in the years during which the retirements were actually made. Inactive gold in the amount of \$1,087 millions for the fiscal year 1937 is considered as a part of the working balance.

## Analysis of Change in Balance of General Fund of the Treasury

Source: Daily Treasury Statements.

\* Less than \$500,000.

1/ This is the net budgetary deficit. Excludes amounts for public debt retirement which are chargeable to the sinking fund, etc., under special provisions of law.

2/ This represents the increase in the gross public debt, except as noted. (See footnote 7.)

3/ Includes Federal Old-Age and Survivors Insurance Trust Fund, Unemployment Trust Fund, Railroad Retirement Account, Government insurance and retirement funds and other trust funds.

4/ Comprise Public Works Administration revolving fund and special deposits (net). Also includes Office of Distribution (formerly Agricultural Marketing Administration) commodity food stamp transactions.

5/ Includes expenditures for retirement of national bank notes.

6/ In the fiscal years 1935 and 1936, \$91 millions and \$554 millions were transferred from increment on gold to the working

balance for retirement of national bank notes. In this statement, however, charges for retirement of national bank notes are reflected directly against increment on gold, in the years during which the retirements were actually made. Inactive gold in the amount of \$1,087 millions for the fiscal year 1937 is considered as a part of the working balance general and special accounts for the purpose of this table.

1/ Expenditures for the retirement of national bank notes from increment on gold for the fiscal years 1935 to 1939 (as shown below) are not reflected herein, but are reflected under increment on gold as follows: 1935, \$91 millions; 1936, \$397 millions; 1937, \$59 millions; 1938, \$51 millions; and 1939, \$5 millions; total, \$645 millions. The increase in the public debt shown in the table "Means of Financing Cash Requirements" for the above fiscal years will not agree for the reason stated above.

<sup>1/</sup> Treasury bills are included in interest-bearing debt figures at face amount, but for purposes of calculating the computed annual interest charge and the computed rate of interest, the discount value is used. For the purposes of computing the

annual interest charge and rate of interest on United States savings bonds, Series A-E are considered to yield 2.90% per annum and Series F is considered to yield 2.53%.

<sup>2/</sup> Guaranteed securities held by the Treasury, and securities guaranteed as to interest only, are not included in this table.

**Maturity Schedule of Interest-Bearing Public Marketable Securities

Source: Daily Treasury Statement, and reports to the Treasury.

- <sup>1/</sup> Excludes postal savings bonds, Federal Housing Administration debentures, and guaranteed securities held by the Treasury.
- <sup>2/</sup> It should be noted that callable issues appear twice in this column, once in the year of first call and again in the year of final maturity. Callable issues with respect to which a definite notice of call has been made, however, are listed as fixed maturities. The abbreviations refer to the following corporations: Home Owners' Loan Corporation and Commodity Credit Corporation.
- <sup>3/</sup> Does not include \$610,000 retired upon exchange during the period November 20-30, 1944, in prepayment for 0.90% Treasury notes of Series C-1946, dated December 1, 1944.
- <sup>4/</sup> Does not include \$168,900,000 retired upon exchange during the period November 20-30, 1944, in prepayment for Treasury bonds of 1952-54, Treasury bonds of 1956-71 and Treasury notes of Series C-1947, all dated December 1, 1944, which were offered for sale during the Sixth War Loan Drive.
- <sup>5/</sup> Represents amount of prepayments received during the period November 20-30, 1944 for these securities which are dated December 1, 1944, and were offered for sale during the Sixth War Loan Drive.
- <sup>6/</sup> Represents amount of prepayments received during the period November 20-30, 1944 for these securities which are dated December 1, 1944, and were offered in exchange for 7/8% Certificates of indebtedness, Series G-1944.

Back Figures: For period December 1944 through October 1942, see "Treasury Bulletin" for November 1944, page 32.

- 1/ Preliminary.
- 2/ In the case of the reopening of a previously offered security, the period to first call and to maturity are calculated from the date interest commences on the reopening.
- 3/ Restricted issues are those which commercial banks (deflected for this purpose as banks which accept demand deposits) are not permitted to acquire prior to a specified date, with two exceptions: (1) concurrently with the Fourth, Fifth and Sixth War Loans, commercial banks were permitted to subscribe to the restricted issues offered in the War Loan for limited investment of their savings deposits; (2) commercial banks may temporarily acquire restricted issues through foreclosure when such issues have been used as collateral.
- 4/ Consists of all public cash subscriptions and of subscriptions by U. S. Government agencies and trust funds.
- 5/ Issued primarily to refund maturing security.
- 6/ Reopening of previously offered security.
- 7/ Interest commenced on October 15, 1943.
- 8/ Announcement of exchange offering was included in announcement of Third War Loan, August 16, 1943.
- 9/ Figures on amount of War Loan securities issued consist both of amounts issued in connection with the Drive, and of amounts issued concurrently with Drive to U. S. Government agencies and trust funds and to commercial banks.
- 10/ Interest commenced on March 15, 1944.
- 11/ Interest commenced on June 26, 1944.
- 12/ Figures on amount of War Loan securities issued consist both of amounts issued in connection with the Drive, and of amounts issued concurrently with Drive to U. S. Government agencies and trust funds and to commercial banks.
- 13/ For detailed information on amount issued, see the articles at the beginning of the Bulletin on "Sales of United States Government Securities in the Sixth War Loan" and "Security Purchases Outside the Sixth War Loan by Commercial Banks and Treasury Investment Accounts".
- 14/ Additional issue offered simultaneously with Sixth War Loan.
- 15/ Exchanged as of December 15, 1944 and accrued interest charged from December 1 to December 15.

Source: Daily Treasury Statements.

\* Less than \$50,000.

<sup>1/</sup> At current redemption values except Series G, which is stated at par.<sup>2/</sup> Estimated, except for Series G.<sup>3/</sup> For details concerning investment yields and redemption values, see "Treasury Bulletin" for August 1943, page 4.<sup>4/</sup> Commercial bank purchases were permitted prior to April 1, 1940, and are estimated to have aggregated about \$300 millions.<sup>5/</sup> Not yet available.<sup>6/</sup> Series A-D, sold between March 1935 and April 1941, are 10 year discount bonds sold at 75% of maturity value, yielding 2.90% per annum if held to maturity; purchases were limited to \$7,500 issue price in any calendar year and from April 1, 1940, could be made only by individuals.<sup>7/</sup> Redemptions of Series A-E bonds by eligible banks and trust companies, which commenced in October 1944 (see "Treasury Bulletin" for October 1944, page A-1), have not been wholly classified by series. For purposes of this table it has been necessary to assume that all such redemptions were Series E bonds even though small amounts of Series A-D may have been included. Consequently the amount outstanding of Series E may be slightly understated and Series A-D slightly overstated.<sup>8/</sup> Series E, on sale since May 1, 1941, is a 10 year discount bond sold at 75% of maturity value, yielding 2.90% per annum if held to maturity; purchases are limited to \$3,750 issue price in any calendar year and may be made only by individuals.<sup>9/</sup> Series F and G have been on sale since May 1, 1941. Series F is a 12 year discount bond sold at 74% of maturity value, yielding 2.53% per annum if held to maturity. Series G is a 12 year current income bond, sold at par, bearing interest at the rate of 2-1/2% per annum, redeemable at par on maturity or at stated prices less than par before maturity. Purchases of Series F and G combined in any calendar year are limited to \$100,000 issue price (\$50,000 in calendar year 1941) and through December 31, 1943 could be made by any investor except commercial banks. Commencing January 1, 1944, commercial banks were permitted to purchase Series F and G bonds under certain conditions. For such limitations for the period January 1, 1944 through November 19, 1944, see "Treasury Bulletin" for December 1944, page 36, footnote 9. Commencing November 20, 1944, the limit on commercial bank purchases was \$100,000 providing that total holdings of Series F and G bonds, 2% Treasury bonds of 1952-54, and 2-1/2% Treasury bonds of 1956-71 did not exceed 10% of the combined amount of time certificates of deposit of individuals and non-profit corporations or associations and of savings deposits, or \$500,000, whichever was less.

Source: Daily Treasury Statements.

1/ Less than \$50,000.

2/ These notes were originally designed to help taxpayers set aside funds with which to pay taxes and were known as Treasury tax savings notes. Series A notes were designed for the small and moderate taxpayer; Series B and Series C notes were intended for the large taxpayer. When the collection of taxes through withholding at the source commenced, the need for Series A tax savings notes disappeared and their sale was discontinued. Redemption provisions on Series A notes were relaxed to provide for the payment of interest on notes thereafter redeemed for cash (see footnote 3). Sale of Series C notes, which were designed for the investment of idle cash reserves as well as for the accumulation of tax reserves, was continued and the notes were designated Treasury savings notes.

3/ Includes matured Treasury savings notes.

4/ Series A notes, which were sold from August 1, 1941 through June 22, 1943, yield approximately 1.92% per annum. Through June 22, 1943, the notes could be redeemed for cash only at the original purchase price; since that date, the notes have been redeemed for cash at

the tax payment value current at the time of presentation. (See also footnote 1.) Prior to October 4, 1943, the maximum amount which could be used in payment of each class of tax (income, estate, or gift) by each taxpayer during each taxable year was limited to \$5,000 par value; this limitation was removed as of that date.

5/ Series B notes were sold from August 1, 1941 through September 12, 1942, to yield approximately 0.48% per annum. The amount which may be turned in on taxes is unlimited. The notes may be redeemed for cash only at the original purchase price.

6/ Series C notes went on sale September 14, 1942. Interest accrues each month on a graduated scale (see "Treasury Bulletin" for August 1943, page 4) to yield approximately 1.07% per annum if held to maturity. These notes may be used in payment of Federal taxes at any time two months after the date of issue. The amount which may be turned in on taxes is unlimited. The notes may be redeemed for cash six months after the date of issue at the tax payment value current at the time of presentation. Prior to July 27, 1943, notice of 30 days was required for cash redemption. See also footnote 1.

Source: Daily Treasury Statements commencing November 1, 1942; prior thereto, Post Office Department.

<sup>1/</sup> Figures for periods prior to November 1, 1942 are not strictly comparable with subsequent data because of the shift to a Daily Treasury Statement basis. Stamps sold prior to October 1, 1942 were known as postal savings stamps and were obligations of the Postal Savings System but subsequently became public debt obligations.

<sup>2/</sup> Estimated on the basis of samples conducted by the Post Office Department.

<sup>3/</sup> Sales and redemptions commence with May 1, 1941 when the special defense series of stamps went on sale. The amount of the old se-

ries of postal savings stamps outstanding on April 30, 1941 was \$150 thousands.

<sup>4/</sup> Details not available for May, June, and July 1941.

<sup>5/</sup> Includes minor amounts which were exchanged for postal savings certificates. These aggregated \$123 thousands for the period August 1, 1941 through June 30, 1942 and \$55 thousands for the period July 1, 1942 through October 31, 1942.

<sup>6/</sup> Net of sales less redemption. See footnote 1.

Does not include amounts transferred from Postal Savings System to the Treasury to cover outstanding stamps.

\* Less than \$50,000.

$\frac{1}{1}$  Consists of purchases or sales made by the Treasury. Treasury investment accounts comprise (1) trust funds which by law are under the control of the Secretary of the Treasury or of the Treasurer of the United States, and (2) accounts under the control of certain

U. S. Government agencies whose investments are handled through the facilities of the Treasury Department. This table also includes purchases under Section 19 of the Second Liberty Bond Act, as amended, and excludes the Exchange Stabilization Fund.

# Treasury Survey of Ownership of Securities Issued or Guaranteed by the United States, October 31, 1944

The following tables present summary data as of October 31, 1944 from the Treasury Survey of Ownership of Securities Issued or Guaranteed by the United States. The banks and insurance companies covered

in the survey account for approximately 95 percent of the amount of such securities owned by all banks and insurance companies in the United States.

Table 1.- Summary: All Interest-Bearing Securities

(In millions of dollars)

		Held by banks 1/ and insurance companies covered in Treasury Survey					Held by U. S.		
	Total amount outstanding	7,291 commercial banks 2/	35 stock savings banks	542 mutual savings banks	942 insurance companies			Government agencies and trust funds, and Federal Reserve Banks	Held by all other investors

## Table 2.- Public Marketable Interest-Bearing Securities - (Continued)

(Par values - in millions of dollars)

Guaranteed securities held by the Treasury are not included. Federal securities fall into three broad groups with respect to imposition of Federal income taxes on income derived therefrom. Wholly tax-exempt securities are exempt from both the normal and surtax rates. Partially tax-exempt securities are exempt from the normal rates except that in the case of partially tax-exempt Treasury and United States bonds, interest in excess of \$5,000 per annum owned by any one holder is also exempt from the surtax rates. Taxable securities are subject to both normal and surtax rates.

\* Less than \$500,000 or less than .05%.

1/ Securities held in trust departments are excluded.

2/ Includes trust companies.

(Par value 1/ - in millions of dollars)

1/ Less than \$500,000.  
United States savings bonds, Series A-D, E, and F are shown at current redemption values. They were reported at par by the banks and insurance companies covered in the Treasury Survey but have been adjusted to current redemption values for use in this statement.

2/ Federal securities fall into three broad groups with respect to imputed interest. Tax-exempt securities are those that derive their interest wholly from tax-exempt securities are exempt from both the normal and surtax rates. Partially tax-exempt securities are exempt from

the normal rates except that in the case of partially tax-exempt Treasury and savings bonds, interest derived from \$5,000 of principal amount owned by any one holder is also exempt from the surtax rates. Taxable securities are subject to both normal and surtax rates. Securities held in trust departments are excluded. Includes trust companies.

Series of Treasury and savings bonds sold prior to March 1, 1941 were partially tax-exempt; those sold on and after that date were taxable. Guaranteed securities held by the Treasury are not included.

1/ When the price of a security is such as to result in a negative yield, the excess of price over zero yield is given in the yield column in thirty-seconds.

2/ Prices represent the mean of closing bid and ask quotations in the over-the-counter market except that prices of Treasury and Home Owners' Loan Corporation bonds for the period prior to October 1, 1939, represent closing prices on the New York Stock Exchange. \*When issued prices are included beginning October 1, 1939. Dates of highs and lows, in case of recurrence, are the latest dates.

3/ Computed on mean price to call date when mean price is above par and to maturity date when mean price is below par.

4/ Included in the average of long-term taxable Treasury bonds.

5/ Quoted on yield basis.

6/ For amount of this security issued on December 1, 1944, see table on

\*Offerings of Marketable Issues of Treasury Bonds, Notes, and Certificates in the chapter on Public Debt and Guaranteed Obligations of the United States Government.

1/ Excludes \$0.6 millions retired upon exchange during the period November 20-30, 1944 in prepayment for new Treasury notes.

2/ Not quoted from November 22 through November 30.

3/ Excludes Federal Housing Administration debentures.

4/ Excludes \$168.9 millions retired upon exchange during the period November 20-30, 1944 in prepayment for new securities.

5/ Called for redemption on December 15, 1944.

6/ This is the only bond eligible to remain in the average of long-term partially tax-exempt Treasury bonds.

7/ Excludes postal savings bonds.

1/ When the price of a security is such as to result in a negative yield, the excess of price over zero yield is given in the yield column in thirty-seconds.

2/ Prices represent the mean of closing bid and ask quotations in the over-the-counter market. "When issued" prices are included beginning November 1, 1941. Dates of highs and lows, in case of recurrence, are the latest dates.

3/ Computed on mean price to call date when mean price is above par and to maturity date when mean price is below par.

4/ Quoted on a yield basis.

5/ Prices quoted are subject to a dealers' commission. Prior to May 15, 1944, these securities were quoted on a yield basis without allowance for dealers' commissions.

6/ So data because security was not quoted on November 30, 1944.

7/ Price history begins May 15, 1944.

8/ Excludes issues completely held by Farm Credit Administration agencies.

# YIELDS OF TREASURY SECURITIES NOV. 30, 1944

Based on Mean of Closing Bid and Asked Quotations

Explanation: The points represent yields to call date when prices are above par, and to maturity date when prices are at par or below. The smooth curves for the various classes of points are fitted by eye. Issues for which an exchange offer has been made or which are due or callable in less than 3 months are excluded.

## Revised Average of the Yields of High-Grade Corporate Bonds

The Treasury average of the yields of high-grade corporate bonds has been revised, beginning November 1, 1944, by the addition of three new bonds to the average and by the removal of three bonds from the average. Price and yield data as of November 1 for the old and the new issues are shown in the following table:

modest premiums. All of the bonds now included are given Aaa ratings by Moody's Investors Service.

The new average on November 1 was 2.63 percent as compared with the old average for the same date of 2.57 percent. There is thus a

Description	Price	Yield (Percent)
<b>Bonds added:</b>		
Consolidated Gas Electric Light and Power Company of Baltimore, 2-3/4's of 1976.....	103-3/4	2.57
Philadelphia Electric Company, 2-3/4's of 1971.....	101-1/4	2.68
Standard Oil Company of California, 2-3/4's of 1966.....	102-3/4	2.58
<b>Bonds removed:</b>		
New England Telephone and Telegraph Company, 4-1/2's of 1958-61.....	124	2.41
Bell Telephone Company of Pennsylvania, 5's of 1957-60.....	129-3/4	2.32
Norfolk and Western Railway Company, 4's of 1996.....	132-1/2	2.81
<b>Composition of revised series:</b>		
Illinois Bell Telephone Company, 2-3/4's of 1981.....	101-3/4	2.67
Boston Edison Company, 2-3/4's of 1970.....	102	2.64
Consolidated Gas Electric Light and Power Company of Baltimore, 2-3/4's of 1976.....	103-3/4	2.57
Philadelphia Electric Company, 2-3/4's of 1971.....	101-1/4	2.68
Standard Oil Company of California, 2-3/4's of 1966.....	102-3/4	2.58
<b>New Average.....</b>	<b>.....</b>	<b>2.63</b>
<b>Old average.....</b>	<b>.....</b>	<b>2.57</b>

The principal reasons for the revision were (1) to exclude from the average all bonds due or callable at par in less than 15 years, in order to make it more nearly comparable with the average of the yields of long-term Treasury bonds, which was similarly revised in March 1944 ("Treasury Bulletin", March 1944, page 58), and (2) to secure a more homogeneous and representative average by eliminating bonds selling at large premiums. It will be noted that the revised average consists entirely of 2-3/4 percent bonds, all of which are currently quoted at

small break in the series, which is explained by the fact that the average yield of the three new issues is higher than that of the three issues removed.

The last previous revision of the average occurred as of July 1, 1941, and was discussed in the "Treasury Bulletin" for July 1941, page 21. A discussion of the corporate average, its composition, and the chief considerations underlying its construction appeared in the "Treasury Bulletin" for April 1943, page 61.

Base of Computation: (1) Treasury bond yields are computed on the basis of the mean of closing bid and ask quotations in the over-the-counter market, beginning September 2, 1941; previously, closing prices on the New York Stock Exchange were used on days when sales took place on the Exchange in a particular issue and the mean of closing bid and ask quotations on the New York Stock Exchange on days when no sales took place. (2) Corporate bond yields are computed on the basis of closing prices on the New York Stock Exchange and the New York Curb Exchange; on days when an issue does not sell, the price of the last preceding sale is used.

Back Figures: Monthly and weekly data for the period January 1933 through March 1944 may be found in the "Treasury Bulletin" for April 1944, pages 57-61.

r

1/

Average of Treasury bonds neither due nor callable for fifteen years. For discussion of composition of average see "Treasury Bulletin" for March 1944, page 58. Partially tax-exempt bonds are those the interest on which is exempt from the normal rates of the Federal income tax, except that in the case of partially tax-exempt

Treasury and United States savings bonds, interest derived from \$5,000 of principal amount owned by any one holder is also exempt from the surtax rates of the Federal income tax. Taxable bonds are those the interest on which is subject to both the normal and surtax rates of the Federal income tax.

2/

For discussion of present composition of high-grade corporate bond average, see the article appearing on page 56 of this issue; for discussion of its previous composition, as well as the considerations underlying its construction, see "Treasury Bulletin" for April 1943, page 61.

3/

Monthly averages of daily figures. Prior to April 1, 1938, corporate bonds are averages of Saturday figures.

4/

The composition of the high-grade corporate bond average was revised commencing with November 1, 1944. See article on page 56 of this issue.

5/

On days when the exchanges are closed, the date and prices of the previous day are used.

6/

Indicates change in composition of average.

7/

Exchange closed.

<sup>17/</sup>

Information not available.

<sup>18/</sup>

Includes advances to Government corporations for which guaranteed securities were held by the Treasury; advances to Federal Reserve Banks for industrial loans; funds from securities received by the Bureau of Internal Revenue in settlement of tax liabilities; funds from securities received from the Reconstruction Finance Corporation under act of February 24, 1938; funds from stock in Federal savings and loan associations; funds from railroad loans (Transportation Act of 1920); and funds of U. S. Railroad Administration (World War I).

<sup>19/</sup>

World War I corporation in liquidation.

<sup>20/</sup>

Represents net expenditures from the General Fund of the Treasury in the amount of \$456,335 thousands for the purchase of obligations of Government corporations.

<sup>21/</sup>

Includes repayment of \$3,910 thousands of paid-in capital of the Federal land banks.

<sup>22/</sup>

Includes repurchase of \$176,000 thousands of the Reconstruction Finance Corporation notes from the Federal land banks. These notes were originally purchased by the Treasury from the Reconstruction Finance Corporation and were sold to the Federal land banks prior to June 30, 1944.

Source: (1) Total receipts from internal revenue: Daily Treasury Statements; (2) Detailed collections by type of tax: Reports of collections made by collectors of internal revenue.

<sup>r</sup> Revised.

- <sup>1</sup>/<sub>2</sub> Excludes collections for credit to certain trust accounts for territories and insular possessions, etc.  
<sup>3</sup>/<sub>4</sub> Includes collection of taxes withheld by employers pursuant to the Revenue Act of 1942 and the Current Tax Payment Act of 1943.  
<sup>4</sup>/<sub>5</sub> Includes income tax collections on Alaskan railroads. The excess profit tax included in this column is that imposed under the Second Revenue Act of 1940, as amended.  
<sup>6</sup>/<sub>7</sub> Consists of the declared value excess profit tax, the profit in-

ing provisions of the Vinson Act, and the tax on unjust enrichment.

- <sup>5</sup>/<sub>6</sub> Represents collections under the Federal Insurance Contributions Act commencing September 1939; prior thereto, collections under Title VIII of the Social Security Act.  
<sup>6</sup>/<sub>7</sub> Represents collections under the Federal Unemployment Tax Act commencing September 1939; prior thereto, collections under Title IX of the Social Security Act.  
<sup>7</sup>/<sub>8</sub> Represents collections under the Carriers Taxing Act of 1937.  
<sup>8</sup>/<sub>9</sub> Includes tax collections under the Sugar Act of 1937 and under the dividends tax imposed by the Act of June 16, 1933.

## COLLECTIONS OF INTERNAL REVENUE

*Includes miscellaneous profits taxes*

Sources: (1) Total receipts from internal revenues: Daily Treasury Statements; (2) Detailed collections by type of tax: Reports of collections made by collectors of internal revenue.

Footed.

<sup>1/</sup> Less than \$500.

<sup>2/</sup> Excludes collections for credit to certain trust accounts for territories and insular possessions, etc.

<sup>3/</sup> Consists only of collections for which returns have been filed with the Collector of Internal Revenue. Collections under the act as shown in Daily Treasury Statements consist of withholdings deposited in Government depositories in addition to payments ac-

companying returns filed with the Collector of Internal Revenue. Current collections consist in general of taxes paid within twelve months after the close of the taxable year for which the return was filed.

<sup>4/</sup> Represents collections under the Federal Insurance Contributions Act.

<sup>5/</sup> Represents collections under the Federal Unemployment Tax Act.

<sup>6/</sup> Represents collections under the Carriers' Taxing Act of 1937.

<sup>7/</sup> Tax imposed upon the manufacture and sale of, and the occupational tax on, mixed flour repealed as of November 1, 1942.
